March 1, 2010

I unreservedly and strongly Mr. Fauteux's editorial on the overdue and critical need to reduce Quebecers' elevated exposure to magnetic fields. These fields pose well-documented risks of leukemia as well as some forms of brain and breast cancers.

Samuel S. Epstein, M.D.  
Emeritus professor Environmental and Occupational Medicine  
University of Illinois School of Public Health  
and  
Chairman, The Cancer Prevention Coalition
