

## **Igor Y. Belyaev**

Dr. Belyaev was born October 25, 1958, in Sakhalin, USSR. He received the M. Sc. Degree (Dipl. Eng. Degree) in Radiation Physics and Dosimetry from the Moscow Engineering Physics Institute (Technical University), Moscow, USSR (1981), the Ph.D. degree in Radiobiology from the Institute of Biophysics of Academy of Science of USSR, Pushchino, USSR (1986) and the D. Sc. degree in Genetics from the Saint-Petersburg State University, Saint-Petersburg, Russia (1994). In 1981-2003 he was a PhD student, Research Scientist, Associate Professor and Head Research Scientist at the Technical University, Moscow. Since 2004 he is the Head Research Scientist at the Laboratory of Radiobiology, General Physics Institute, Russian Academy of Science, Moscow, Russia. Since 1994, Dr. Belyaev has been working at Stockholm University, Stockholm, Sweden, as a Visiting Scientist, Senior Research Scientist and Group Leader. He is Associate Professor at the Dept. of Genetics, Microbiology and Toxicology, Stockholm University, since 2004. His professional research area is biological and health effects of electromagnetic fields and ionizing radiation, DNA damage and repair, chromosomal aberrations, apoptosis, molecular markers for radiosensitivity. He is co-author of more than 70 scientific publications. Dr. Belyaev is a member of the Task group of the International EMF Project of World Health Organization, the Memorial Fund Committee of the Bioelectromagnetics Society, the Section K of the Swedish National Committee for Radioscience, the Russian National Committee on Non-Ionizing Radiation Protection, the Editorial Boards of the journals "Radiat. Biol. Radioecol" and "Electromagnetic Biology and Medicine", of the Bioelectromagnetics Society, the European Bioelectromagnetics Association, and the Swedish Society for Radiobiology.
